

I Love MyPetBox

Coloured, Super-resistant, Safe, Light and Comfortable Cages

I Love MyPetBox cages ensure unique durability, versatility and modularity.

These cages provide your friend with an unique, durable and attractive space that will allow you and your pet comfort, convenience and safety.

You can even use them as a carrier, helping your friend feel more secure when leaving the usual environment.

I Love MyPetBox's safety and comfort is demonstrated by ISFM's certification Cat Friendly Clinic Silver Standard for feline hospitalisation cages.

Colorful and Super Resistant

I Love MyPetBox cages are colorful, there are many shades available, from the neutral to the most vibrant. With them you can create light and pleasant environments for yourself and your friend.

The structure of the I Love MyPetBox cages is composed of a single piece of high density polyethylene, which gives it high strength and durability, being lightweight. In the structure is applied a stainless steel door.

Safe and Comfortable

I Love MyPetBox cages are made of high density polyethylene, which makes them inert (they will not react with any substance that is in contact with the structure) and nontoxic (they do not cause intoxication).

The inner corners are rounded to ensure comfort and protection to your friend. The doors have a latch, which prevents your pet from freeing itself.

I Love MyPetBox cages are impermeable, so there is no transmission of liquids from outside to inside or vice versa.

Modular System

I Love MyPetBox cages have a modular system, with fixation on both sides and at the top and base, which makes the assembly stable.

They are lightweight so they can be moved and carried easily.

There is also the possibility of having them applied on a base, with or without wheels, which allows to lift them from the ground or easily moving the assembly.

Cage's External Dimensions: 61x56x56cm

Cage's Internal Dimensions: 61x52x53cm
